

Autism Screening Clinic

When:

Tuesday December 19, 2017 and January 10, 2018

Where:

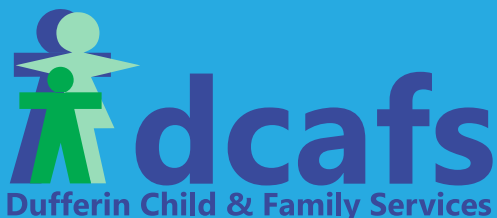

Dufferin Child and
Family Services
655 Riddell Road,
Orangeville

Who: Any child between
12 months to 24 months

Evidence shows that Autism can be detected at age 1 year in some (but not all) toddlers. Results of the Pierce study (2011) indicated that some toddlers show early signs of autism and other delays at 12 months using a simple, broad band screening tool (i.e., the CSBS DP IT Checklist, ESMART) it takes only 30 minutes for a caregiver to complete.

**Please call Stephanie @ 519-941-1530 x 295
to book your appointment**
